

## Cleondris™ Product Announcement

# HCC: HCI Control Center

Cleondris HCC is the premium add-on for NetApp™ HCI

Cleondris HCC (HCI Control Center) adds DR (disaster recovery) as well as data protection capabilities to new and existing NetApp HCI deployments. It is fully integrated with the NetApp SolidFire storage engine and can backup any kind of data and applications. Thanks to its cloud integration and compatibility with VMware and NetApp Data ONTAP (on-premise and cloud) it is absolutely future proof.

## Cleondris HCC Features

### DR WITH VMWARE INTEGRATION

NetApp MetroCluster for Data ONTAP is a well known disaster recovery solution for enterprise storage environments. Cleondris HCC adds similar features to NetApp HCI. When a customer site fails, HCC can be used to recover all data at a secondary HCI site, including policy-based VM startup orchestration - no VMware Site Recovery Manager needed!

### HCI OPTIMIZED BACKUP & RESTORE

Cleondris HCC is the first data protection solution optimized for NetApp HCI/SolidFire. It fully supports VMware, but unlike other backup solutions is not limited to this use case. HCC can backup any kind of data: either using local SolidFire snapshots, replicated SolidFire snapshots, SnapMirror to ONTAP or even backup to S3.

### READY FOR THE FUTURE

HCC's roadmap is exciting: whether on-premise (VMware, KVM, Docker, Kubernetes) or hybrid cloud (AWS, GCE, Azure): HCC grows with your company and opens the doors to these platforms for you.

## Availability

Cleondris HCC will be released in an incremental manner. The first initial public release is presented at NetApp Insight Vegas and available in November 2018, it includes the initial DR support for HCI. In December 2018, at NetApp Insight Barcelona, we present the second major release, with data protection capabilities and improved DR.

### → SYSTEM REQUIREMENTS/ COMPATIBILITY

SolidFire Element OS 10.1+  
VMware vSphere 5.x/6.x  
Clustered Data ONTAP 8+ (optional)

### → DEPLOYMENT

Cleondris HCC comes as a self-contained virtual appliance (OVA) that can be deployed to vSphere in seconds.

### → LICENSING

Cleondris products are licensed per storage node and per ESXi node. Specific licensing and pricing information for the HCC product line will be available later in 2018.

### → FREE TRIAL

Trial licenses for HCC can be downloaded from the Cleondris support portal for free.

### → LEARN MORE

Please visit the Cleondris website to learn more about HCC and to register for our HCC newsfeed.
